## 1. Product Introduction of the Billiard Snooker Cue Bottom Protector

Billiard Snooker Cue Bottom Protector is an accessory for billiard cues. Used in billiard cues, installed on the bottom of the cue. The purpose is to protect the billiard cue from being damaged due to the vibration generated by the contact between the cue and the ground when the cue is put down. The product is made of rubber, which has good shock absorption capacity, and its material is soft and light, and will not increase the weight of a lot of pool cues.

E-mail: Dylan@tec-rubber.com

EPDM is a synthetic rubber polymer and is made from ethylene and propylene monomers. This rubber was developed in the early 1960's and used to produce variety of products like radiator and steam hoses, freezer gaskets, tires, roofing membranes and aircraft seals to name only a few.

#### **4. Why is rubber used to produce industrial products?**

Rubber has certain unique properties which makes it suitable to produce rubber products which are widely used in various industrial applications. Rubber is water repellent. It is resistant to alkalies and weak acids. Rubber has elasticity, toughness, impermeability, adhesiveness, and electrical resistance. These properties make rubber useful as an adhesive, a coating composition, a fiber, a molding compound, as well as an electrical insulator.

#### **5. Which type of rubber is best for my application?**

There are a range of natural and synthetic rubbers with different properties, making some more suitable than others for particular applications—the key of course is choosing the most appropriate one! For specific requirements, please ask our rubber products specialists for guidance.
